

# Tables Challenge

Choose one table you know you are not really confident with yet.

It can be 2, 3, 4, 5, 6, 7, 8, 9, 10 or even 11 or 12.

Spend some time as often as possible through the week practising your table. Watch the video to see how to practise your table: [How to Practise Video](#)

1. Play with the Numicon to check you really understand it: [Number Frames \(mathsbot.com\)](#)
2. Play with the 100 square to spot the patterns in the table. [Hundred Square \(mathsbot.com\)](#)
3. Chant your table over using the tables poster. [Tables Poster.pdf \(sharepoint.com\)](#)

Once you are ready to test yourself, go into Hit the Button to see how fast you are - play 'Hit the Answer' and 'Hit the Question' for your chosen table. Can you get 20 right in the time? [Hit the Button - Quick fire maths practise for 6-11 year olds \(topmarks.co.uk\)](#)

Once you are confident with that table, move onto a new one.
