

Our Nursery Improvement Plan

Foster the language of learning across the nursery setting.

Continue to develop our use of technology in the nursery.

Develop play and learning.

Focus our professional dialogue and moderation to enhance the way we share the learning through our environment.

We will do this as a staff team but also with the help of the learners and our families.

Develop our understanding of specific software that can support our play and learning.

Engage in peer moderation with our staff team to enhance our quality interactions with learners.

Engage in staff training with development officers from Fife Council.

Our training will enhance our understanding of learning walls, Blooms Taxonomy, Children's Rights and Schemas.

Continue to focus on ways we can use technology to extend the play and learning in our nursery.

Technology will be integrated with the learning we provide across the curriculum.

Continue to engage in quality assurance and moderation around our planning and recording of evidence.

This will help us to continue to develop effective learning opportunities in our setting.
