

## iPad Apps for Learners with Dyscalculia/ Numeracy Difficulties

**iPad Apps for Learners with Dyscalculia/Numeracy Difficulties** is by no means comprehensive but tries to find apps that will help to embed numerical learning and to give opportunities for repeated practice of concepts that cause difficulty. We would stress that, particularly for dyscalculia and maths, individual apps provide useful practice and reinforcement, but are not a substitute for sound teaching.

If you use the electronic version, clicking on the individual app names or icons will take you to information on each app in the Apple App store.
