

This week in P4/5/6 we have been making posters about John Muir's life. We have been reading for information and we have used this in our own words to write about John Muir. Some interesting things we found out are; he walked a 1000 miles from Wisconsin to Florida after a tool he was using struck his eye and made him temporarily blind. We think, when he recovered and did the walk, he wanted to see more nature. He helped to make the first National Parks and he is famous for being kind to animals and nature.

We have been working on our ball skills in PE. This week we developed our throwing, catching, dribbling and shooting skills for basketball. To be successful in catching put one foot behind and have your hands ready in a W shape. For throwing, put one foot forward and bend your knee. We have also been improving our rounders skills. We wanted to get better at batting and catching. We made sure our hands were ready and were gripping the bat properly

For internet safety we have been learning the importance of not giving out personal details, keeping profiles on private or friends only, and to not trust strangers. We practised this by listening to a scenario and deciding which side of the room to stand on: it's ok, or not ok. This game was good because it made us talk and think carefully.

Today, on Newsround we heard that some of the things on the internet are real and some are not. There are some science videos that have been made by AI that are untrue. The voices on these videos can sound robotic. Next week, we are going to learn how we might be able to find a good source of information that we can trust.
