

P6/7

22nd September 2023

Numeracy

We have been revising place value of decimal numbers- counting forwards and backwards, ordering, and rounding to nearest whole numbers, one decimal place and 2 decimals place. We also looked at finding the number which is halfway between a number from 0-50,000 and 0-500,000 and 0-5,000,000

Literacy

Extending and up levelling our example sentences using this term's ambitious spelling words. Some of us even wrote short stories and poems inspired by Ardroy!

We spent a lot of time learning how to write instructions for our wood work model. We looked at a high quality example to find out how to be successful and then we wrote our own using the information, notes and vocabulary from our personal Design Technology Projects. We can't wait to make the real models!

Reading Groups- Book Detectives roles Visualiser and Predictor.

Topic

We continued research in our research groups for different areas of the Guardians of the Garden learning, such as finding out what insects are good and bad, and the pros and cons of nettles. Next week we will share our findings at the committee meeting.

Health and Wellbeing

We have been learning another tool for our wellbeing which is the Flashlight Focus- it will help us when we are pausing rather than reacting. Our focus flashlight will help us to feel and think and shine a light on what is really going on inside of us when we are angry or sad, to help us to respond rather than react.

Home Learning

- See Home Learning grid
- Maths worksheet- Decimals
