### Literacy

We have been learning how to write a great Film Review in response to the film we saw at Discovery Festival, 'Zarafa'. We looked at an example of a great film review and discussed what made it good before writing our own. It was important to include our opinions and to try to persuade the reader to see the film or not.

'Zarafa' was about a boy named Maki and a giraffe. They met a man called Hassan and flew to Paris, France in a hot air balloon. They went to Paris to try to persuade the King of France to help them in the war against the Turks. They did not get help from the King and then Zarafa the giraffe was kept in a zoo. The Hunter made the boy a slave but Maki escaped and was able to return home where he started a village. The giraffe stayed in Paris and had a companion giraffe in the zoo and they had baby giraffes. The film gave a wave of emotions such as happiness, sadness, excitement and adventure and fun all at the same time.

### Numeracy

This week we have looked closely at the formal methods of presenting our work in both addition and subtraction. We have practised with 2,3,4 and 5 digits, and we know how to carry and borrow our ones, tens and hundreds to complete these calculations.

### Art

We had a ticket designing competition for the Halloween Disco. The winner was chosen by a class vote. We also learned to make very tricky origami skulls. To be successful we had to pay close attention, measure accurately, fold tightly and draw the face on the correct side of the paper.

### ICT

We have started work on our woodwork models after many weeks of designing, modelling, planning and problem solving.

### Home Learning

- Practise formal methods for addition and subtraction- worksheet. Please use the method as practised in class this week.
