

## Literacy

3<sup>rd</sup> November 2023

We have started our new spelling words which are all words related to our woodwork learning. We have worked on up-levelling sentences and using their/they're and there correctly. In our reading groups we wrote a list of words, phrases or anything we did not understand and then discussed in groups to clarify, then checked in a dictionary. This is the Book Detectives Clarifier role.

## Numeracy

We have learned how to multiply 2 digits by 1 digit, 3 digits by 1 digit, 2 digits by 2 digits and 3 digits by 2 digits using the method of our choice- GRID or FORMAL. We know that continuing to work on Times Tables recall will help us with bigger multiplication calculations.

## Art

We learned how to fold and cut paper to make Halloween garlands, spider webs, ghosts and pumpkins to decorate the hall for the silent disco.

## ICT

Some of us got to work on the start of our woodwork projects, finding the equipment we want to use, following our instructions, and learning to use the tools safely.

In computing, we learned how to change the font type, colour and size and we learned how to insert images from camera roll and from the internet. We also learned how to format our images.

## PE- Street Dance

We have learned about the history of street dance and hip-hop dance. It originated in The Bronx, New York. Street dance is an umbrella term for lots of different types of dance. Sometimes street dancers in competitions perform one-upmanship. Then, we learned some moves and we have started to make up our own routines in small groups.

## Home Learning

- Practise grid methods or formal methods for Multiplication. Please complete using the methods taught in school.
