

This week we have been learning about fractions in maths; halves, quarters, thirds and fifths. We have done an assessment to find out what we already know and remember how to do. Next, we will learn more about equivalence and mixed numbers.

We were learning how to keep a beat in music. We can name beats such as; crotchet, quaver, and semi-quaver. We needed to clap and say rhythms and used words like 'Henrietta' and 'lollipop' to help.

This week in writing we have been learning how to write instructional writing. We looked at examples, 'How to make pancakes'. We highlighted the things we need to include in our instructions. We need to include, a list of resources, a clear list of steps, time connectives and a title. We also need to write in the present tense. We have used this learning to write instructions about how to play Jungle's on Fire.

This term we have enjoyed having Connor in our class, unfortunately this is his last week and he goes back to university to continue learning how to be a teacher. We wish him the best of luck.
