

# Our School Improvement Plan 2023/2024

Improving the use of Digital Technologies specifically using digital tools to enrich and support teaching and learning.

All learners will benefit from improved feedback that is based on accurate assessment data that includes clear strengths and next steps.

Develop our systems in school to support wellbeing, achievement and inclusion.

All learners will experience learning that is supported through an entitlement to digital technology that meets a standard based on a shared understanding expectations in lessons.

Staff to engage in a lesson study model of enquiry to investigate how their teaching approaches positively impact learners in their class.

Ensure whole school community are engaged in the refreshed vision and values of the school.

Across the school learners will show evidence of raised attainment in writing because of the removal of barriers by digital technology.

Almost all learners can identify their next steps because of robust ongoing assessment and feedback.

All children requiring additional support have high quality individualised and meaningful summaries of support. These are reviewed at regular opportunities.
