

Learning across the four contexts at MPS - Term 1

Opportunities for personal achievement

Talks and 'My World of Work'

All children will perform a talk this term. P6 are applying for their dream job and P7 are applying for their preferred P7 duty. This work will link with the 'My World of Work' programme we are about to begin in class and will highlight to pupils the different skill sets required within different jobs. All P7 pupils will be given a P7 duty following their talk/ application (please note: this may be different from the role they apply for, but all duties will have importance within MPS). P6s can look forward to this opportunity next year!

Assembly

Each week, a couple of children from the class will be recognised for their efforts and celebrate being 'Star of the Week'. We are also working hard to get 'Class of the Week'!

School Values

We are reminding ourselves of our school values and working hard to demonstrate this everyday around the school.

Outdoor Learning

Children will have the opportunity to develop their teambuilding, communication and social skills during our outdoor learning opportunities.

Supporting our Peers

P6s will continue to get opportunities to link up with their buddies and support our P1s with their settling in phase to school life. Once duties are assigned, P7s will enjoy taking responsibilities within the school supporting staff and pupils.

Ethos and life of the school as a community

Interdisciplinary Learning

Topic

Our topic in terms 1 and 2 is 'Save the Polar Bear'. We have discussed as a class what we would like to learn and how we will do this. We plan to cover topics such as: climate, habitats, Arctic animals, food chains, adaptations and snow. We want to use technology, art, science experiments and construction materials to support our learning.

ICT

We will be familiarising ourselves using the Chromebooks and accessing GLOW and improving our independence in preparation for our individual iPads in term 2.

Literacy

Our class novel is "Wonder". We will use this to complete shared reading activities and to support our writing and Health and Wellbeing lessons. We will have a big focus on V.C.O.P and imaginative writing.

Numeracy & Maths

In numeracy, we will focus on place value and the importance of rounding, bonds and relationships between the 4 operations. In maths with Mrs Kinnear we will be working on shape, position and movement.

Health and Wellbeing

In gym our focus is Basketball. We will also complete some other ball team games during outside gym. (Gym days: Wednesday & Friday) We will spend time looking at Growth Mindset as well as using our novel to discuss diversity and inclusion.

Curriculum areas and subjects

The Curriculum

The totality of all that is planned for children and young people throughout their education'
