

Pittencrieff Primary School & Nursery Improvement Plan 2025–2026

Using Technology to Help Our Children Learn

What's our focus?

We're using iPads and digital tools to make learning more fun, easier to understand, and better suited to each child's needs.

What will happen?

- Teachers will get training on using iPads and apps to support learning.
- Children will use technology to help with learning.
- We'll make sure learning works for every child, including those who need extra help.
- Parents will get chances to learn how to support their child with digital tools at home.

How will we check progress?

We'll ask children, parents, and teachers how it's going and look at learning results.

Why?

Using technology helps children learn better and get ready for the future.

Supporting Every Child to Learn and Grow

What's our focus?

We want to make sure learning fits each child's needs so everyone can do their best. We're working to make lessons clear, exciting, and easy to understand for all children.

What will happen?

- We'll use special tools to spot when children need extra help early and plan support.
- Teachers will follow a clear lesson plan that helps all children learn important skills for school and life.
- Staff will keep learning new ways to make lessons fair and interesting for everyone.
- We'll use resources to make learning accessible for all.

How will we check progress?

- We'll look at test results and track how children improve over time.
- We'll listen to staff, children and families about how learning is going and what could be better.

Why?

Because every child deserves to feel included, confident, and excited to learn!
