

# Scarlett's Wish

June 2022

Scarlett, born in 2014 lives with Dravet Syndrome, a rare, genetic epileptic encephalopathy that gives rise to seizures that don't respond well to seizure medications.

Scarlett loves Mr Tumble, In the Night Garden, animals and is always excited by theme parks and rides.

Although Covid caused complications, we were really happy to grant Scarlett's Wish of visiting Cbeebies Land and staying in the 'In The Night Garden' suite. Scarlett and her family took full advantage of being at the theme park and had an amazing family trip.

*"She had no idea but after visiting alton towers before we knew this was the right choice.*

*Our final day was her 8th birthday and what a birthday to remember! It's taken 8 years for her to grasp some meaning to what a birthday is and we spent a few weeks teaching her she will be 8!*

*Thank you so much for memories to last a lifetime"*

**Scarlett's Mum**
