

# Digital Diary

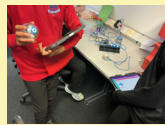

## SPRING UPDATE

Welcome to the Spring edition of the Antonine Primary Digital Diary. The digital leaders packed up the old iPads and organised and distributed our new iPads and styluses, this term. We can't wait to see them in action.

## SPHEROS

This term, we explored the use of Spheros in our digital meetings. We learned how to code them to make them move and change colour. We hope to be able to share what we've learned with other classes.

## MICRO BITS

The Digital Leaders have been exploring the use of the BBC micro:bits. We have been learning how to pair and code the micro:bits to complete a range of tasks! We are still in the early stages of this but hope to peer teach to other children sometime soon!

## RESOURCES

- We continued to audit our digital resources this term.
- We hope to build a bank of them which classes can access.

## MOVING FORWARD

The Digital Leaders will:

- share our digital knowledge with our classes
- continue to update the school website
- trouble shoot problems that arise with iPads.

Lastly, Antonine's Digital Leaders hope everyone had a relaxing, enjoyable Spring Break!
