

Digital Diary

TERM 4 UPDATE

Welcome to the summer edition of the Antonine Primary Digital Diary. The digital leaders continued to explore our coding resources and support our classes with their digital needs.

SCRATCH CODING

This term, some classes have been undertaking the Commonwealth Games coding challenges on the ScratchJnr app. These were created by the Glasgow City Council. We have been learning about the different sports and improving our coding skills at the same time!

BEEBOTS

This term, we explored the use of Beebots in our digital meetings. We learned how to code them to move around a maze that we created. We hope to be able to share what we've learned with other classes.

RESOURCES

- We continued to audit our digital resources this term.
- We hope to build a bank of them which classes can access.

MOVING FORWARD

The Digital Leaders goals for next session are:

- get better at coding sferos and microbits
- share what we have learned with our peers, and beyond!
- continue to update our school website.

Lastly, Antonine's Digital Leaders hope everyone has an amazing summer holiday!
