

You will need your green die for this. Your green die has odd numbers on it. Roll the die and look for the window with the same number. Try to answer the question at each window and mark off when you have answered them all. You may wish to use your Read, Write, Count Workbook to record your working.

Look through the book and see how many numbers you can find

Look through the book. How many shapes can you identify?

Look at the Facts and Snaps. Which animal has the largest average size and which animal has the smallest average size?

Look at the first two pages and look at the animals who are standing in the line. Order them from smallest to tallest

The Fried Egg Jellyfish has an average size of 35cm. Can you find any objects at home, in school or outside which are the same length as the jellyfish?
