

masks,
Face shields,
and gloves,
Oh my!

When I am at the store
or at an appointment, I
will see people wearing
protective equipment.

2

Protective equipment keeps
people safe from germs.

3

One piece of protective
equipment is a mask.

4

I might see kids, adults,
teachers, store workers,
grandparents, doctors and
nurses wear masks.

© Autism Little Learners

5

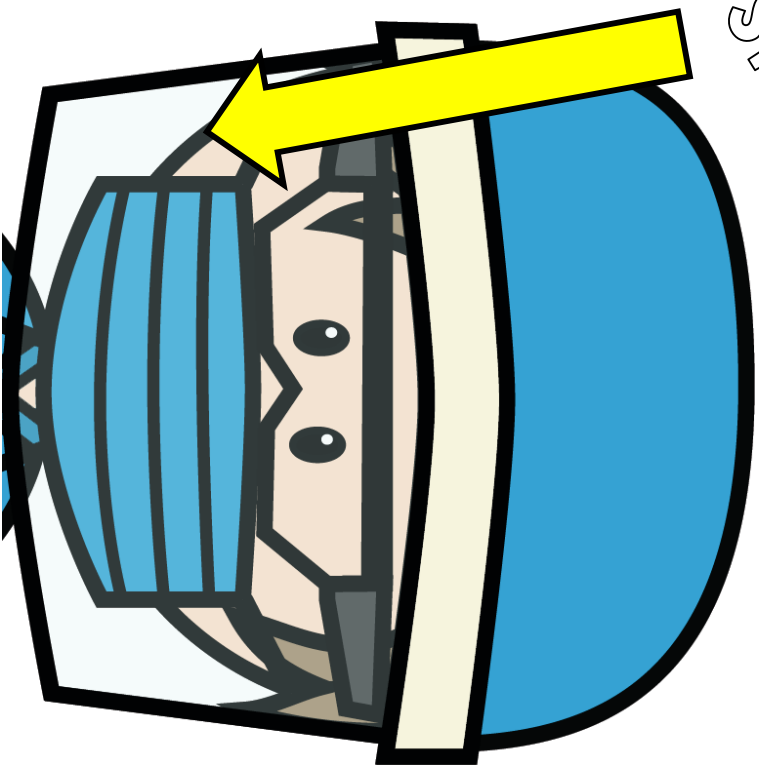

Some people wear
bandanas, scarves or
other face coverings
instead of a mask.

6

FACE
SHIELD

Another thing I might see is a face shield. This is a clear, plastic shield that covers someone's face.

© Autism Little Learners

7

Usually, a doctor, nurse or dentist will wear a face shield.

© Autism Little Learners

A face shield can protect from coughs and sneezes

8

GLOVES

Gloves can also protect people from germs.

9

I can try to remember
that behind the protective
equipment are people with
noses and mouths.

They might even be
smiling at me!

12

I will get used to seeing more protective equipment.

13

Masks, face coverings, face shields and gloves are just some of the things that help protect from germs. It's okay!
