

How to get rid of

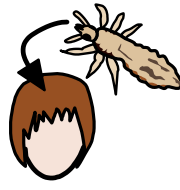

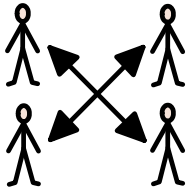

Headlice with a

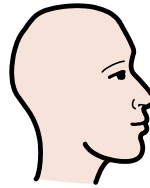

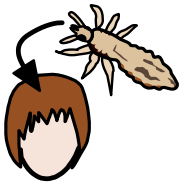

special comb

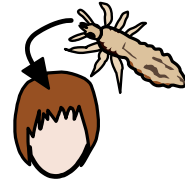

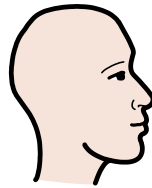

Headlice live in people's hair.

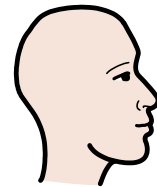

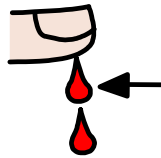

Anyone can catch headlice.

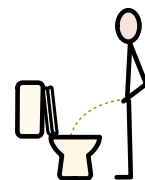

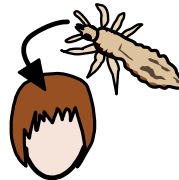

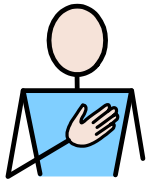

A headlouse crawls onto a head then it

will crawl to the scalp. The headlouse

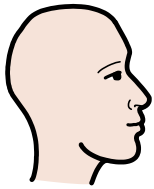

bites and then sucks blood. The head

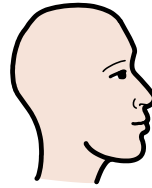

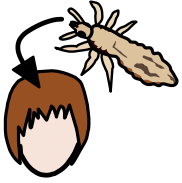

feels itchy because the headlouse wees on

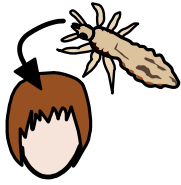

the skin of the head.

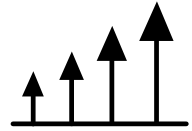

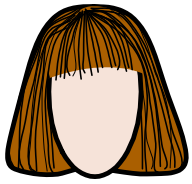

The head feels itchy because the

headlouse poos on the head.

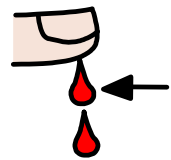

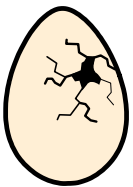

The headlouse then lay eggs on the

hair. The nit egg will grow

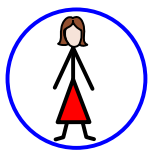

and when it is big enough it will

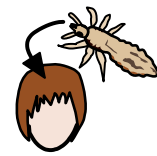

hatch. The new headlouse will suck blood

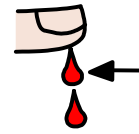

too.

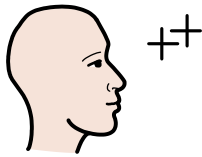

++

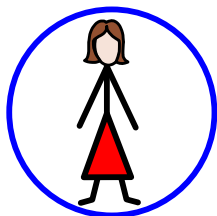

Mums can get get rid of headlice

and stop them from sucking blood and

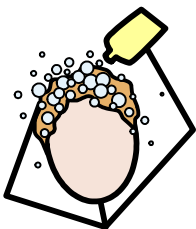

making heads itchy.

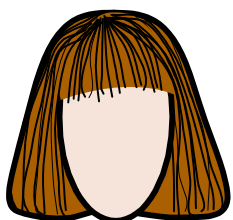

++

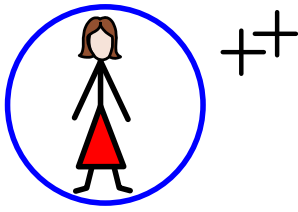

Some mums use special

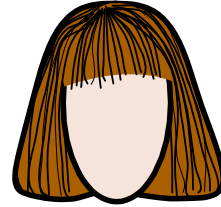

shampoo. This will make the

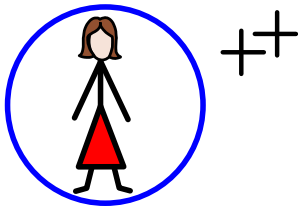

hair wet.

Some mums use special mousse.

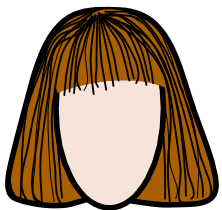

This will make the hair wet.

Some mums use a

special comb. This will keep the

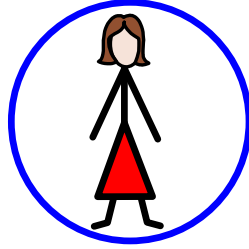

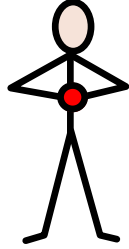

hair

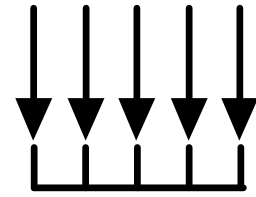

dry.

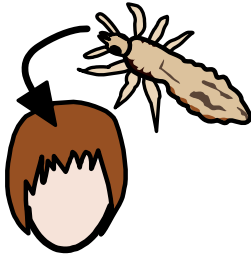

I will try to sit still

and let my mum use a

comb to get rid of all

the headlice.

I

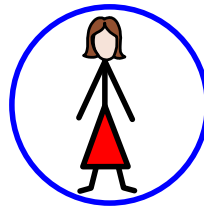

will

let

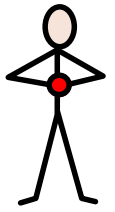

my

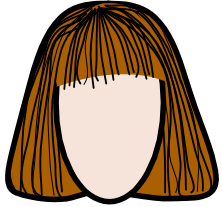

mum

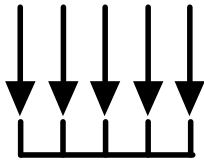

comb

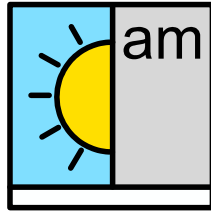

my

hair

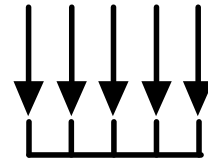

every

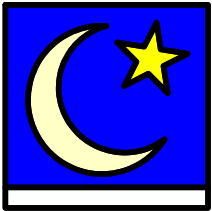

morning

and

every

night.

I

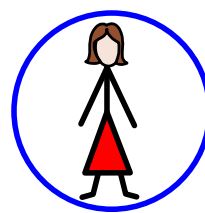

can

help

my

mum

by

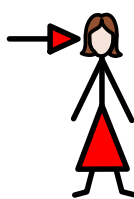

sitting

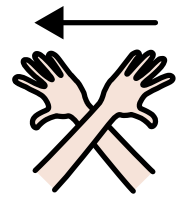

still

until

she

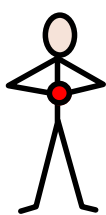

has

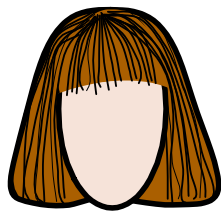

finished

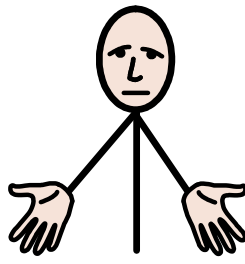

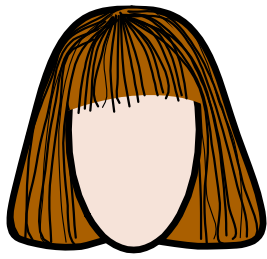

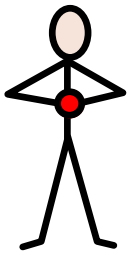

combing

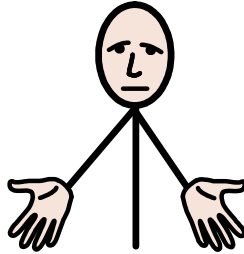

my

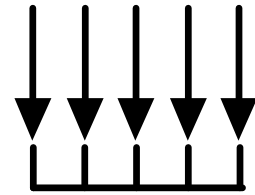

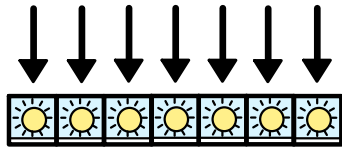

hair.

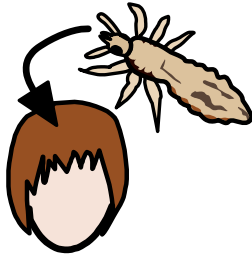

My hair needs to be kept

clean and needs to be

combed every day to kill all

the headlice.

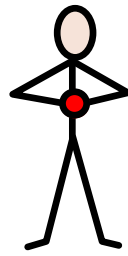

I

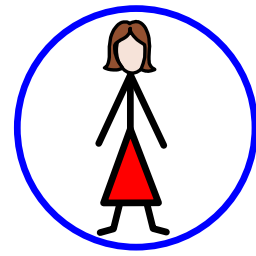

will

let

my

mum

use

the

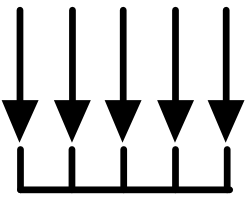

comb

to

get

rid

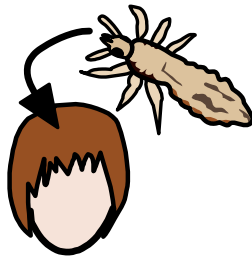

of

all

the

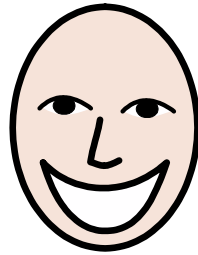

headlice.

I

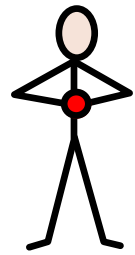

will

be

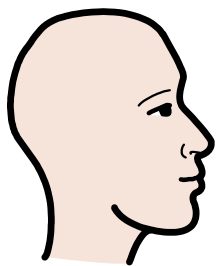

happy

when

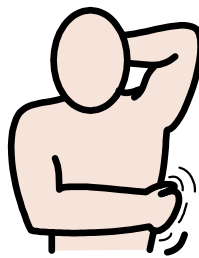

my

head

stops

itching.
