

Using Showbie to Support Learning

Getting Started

Your child has already been assigned to their class, and has received their log in information on a card for safekeeping.

The Showbie app looks like this:

It can be downloaded from the App Store on any Apple or Android device. On a school iPad it can be downloaded from the Self Service function.

If you are struggling to download the app for any reason, you can also use Showbie directly through your web browser on a computer, laptop, tablet or phone.

At School

Showbie is used as a **blended learning** resource. This means it is an extension of our classrooms in school. We use Showbie for weekly homework, and sharing photos of learning in class. We might also use Showbie for learning in class sometimes.

Staff will not always be available to respond immediately to messages from children and staff will not be checking their messages after 5pm.

We would also like to remind parents that Showbie should not be used for parental communication, If you would like to speak to your child's teacher, please call the school office.
