

Maths is all around you— when you shop, you bake, in timetables. Talk about this with your child

Play board games, snap, jigsaws or maths games.

Talk about the numbers you see around you

## Maths Matters

Sing number songs. Use number cards, fingers, buttons, socks to help with counting.

Your child may be able to say the numbers to 10 but check they understand what the numbers are: can they count on from a given number, can they give you a certain number of items, can they tell you the number before or after.
