Analysing CAD Questions

When analysing CAD models you should follow this procedure:

1. What is the main CAD Feature used?
   - Extrude
   - Revolve

2. What is the initial profile? *(Tick off dimensions as you use them)*

3. What other features have been used?
   - Offset or mirror
   - Addition or Subtraction of CAD features above
   - Addition or Subtraction of Array (Linear, Radial or Box)

4. What edits have been used?
   - Fillet
   - Chamfer
   - Shell

5. Have you ticked off all dimensions in step 2-4?

6. Have you included sketches to aid your answer?

Answers should follow this order in bullet points with sketches
