

University  
of Glasgow

# Sutton Trust Summer School

July 5th-10th 2020

In partnership with the Sutton Trust, University of Glasgow offers a week-long residential summer school aimed at high school students in their penultimate year of study. Successful applicants from around the UK will attend lectures and seminars, take part in stimulating activities around campus, and explore the city of Glasgow with their fellow scholars.

Our subject streams introduce students to the variety of academic areas you can study at university in Scotland. Additionally, all students complete our online Academic Skills module designed to prepare for the transition to Higher Education. Completion of this module will be taken into consideration upon application to the university and can form a part of an adjusted offer of entry.
