

Adding a Header

You can add a header image to make you blog more attractive.

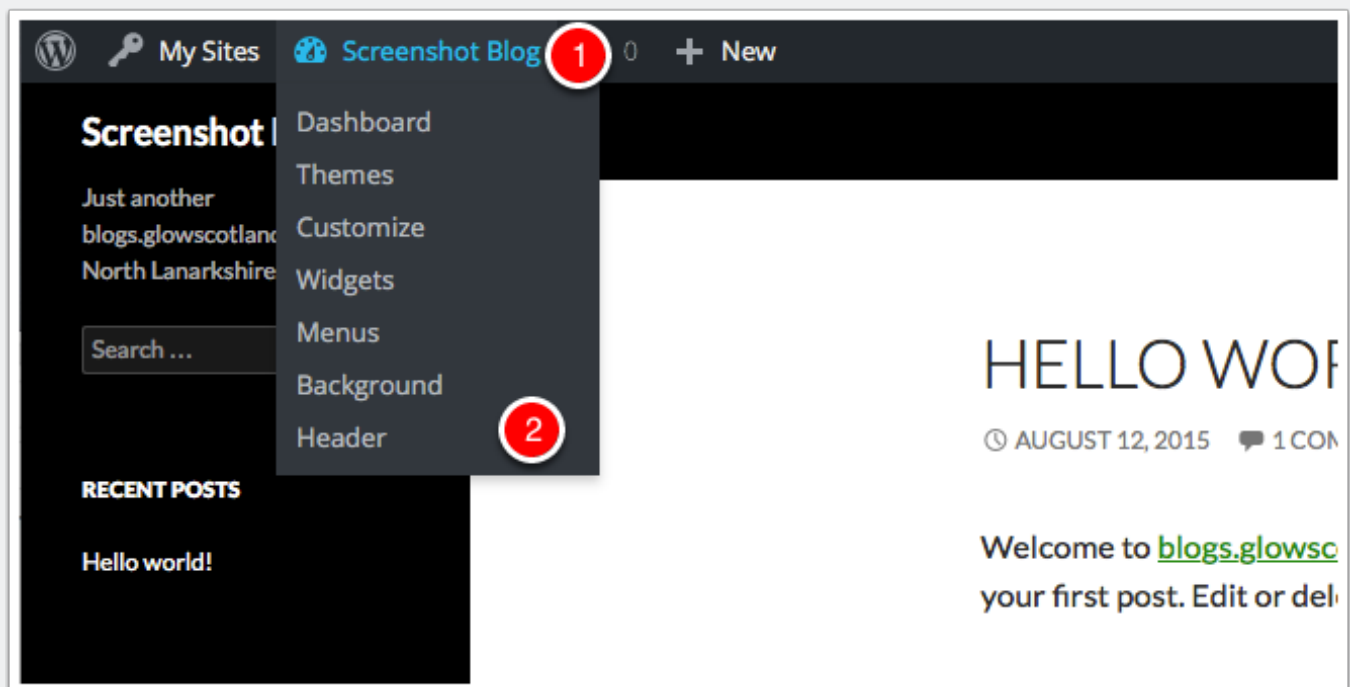

NB different themes may work differently. For example they need different sized images.

Accessing the Header Editor

Either :

On your blog's dashboard, got to Appearance-> Header

or on the hover over the blog name **[1]** in the **Admin bar** and choose **Header[2]**.

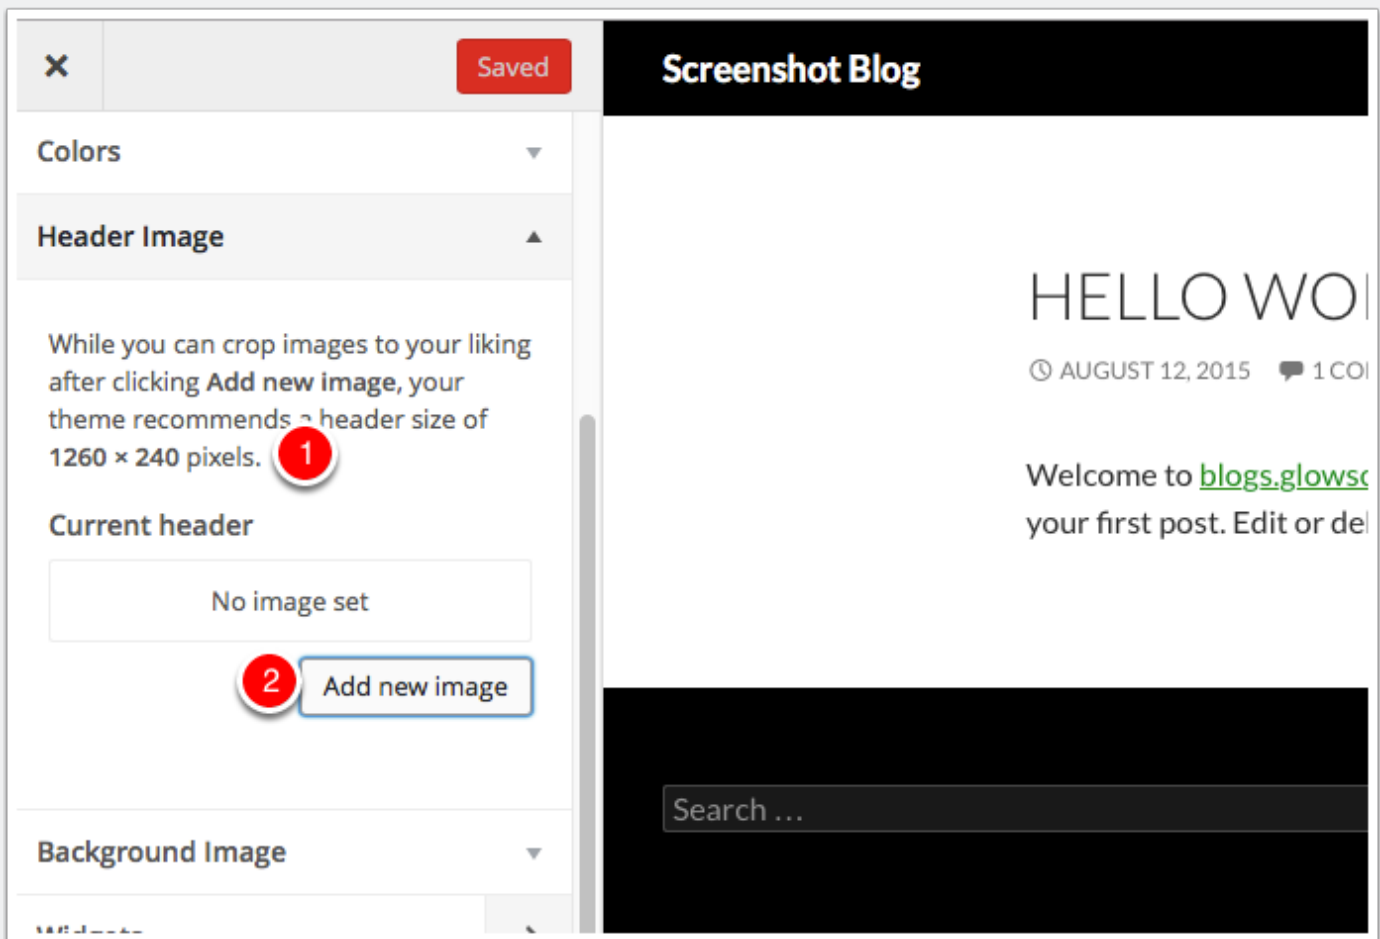

Adding a Header

Header Section of The Customiser

The step above opens the Header Section of the Customiser.

Note that you are told the size of image that is needed **[1]**.

Click **Add new image**. **[2]**.

Adding a Header

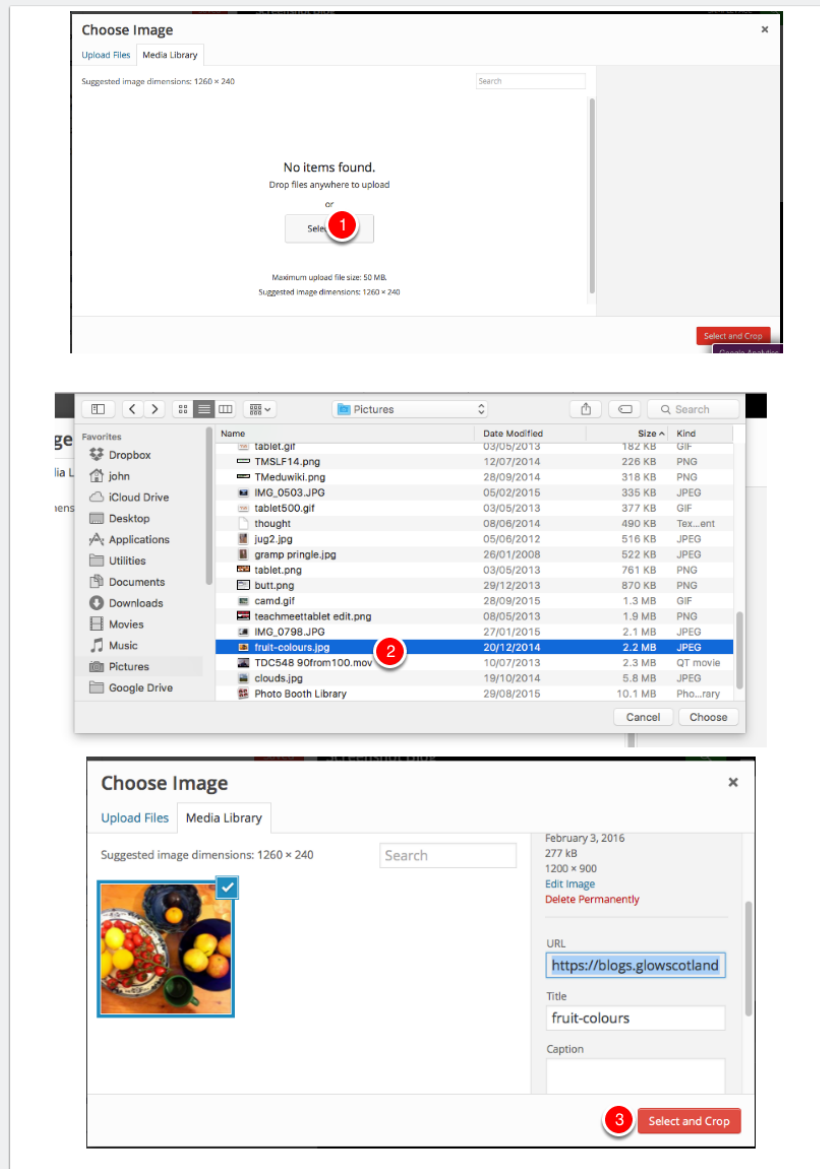

Choose an Image

The Media Library Will open, you can choose an exiting image if any or Select Files from your computer **[1]**.

Pick a file from your computer **[2]**

The image will upload and selected. Choose **Select and Crop [3]**.

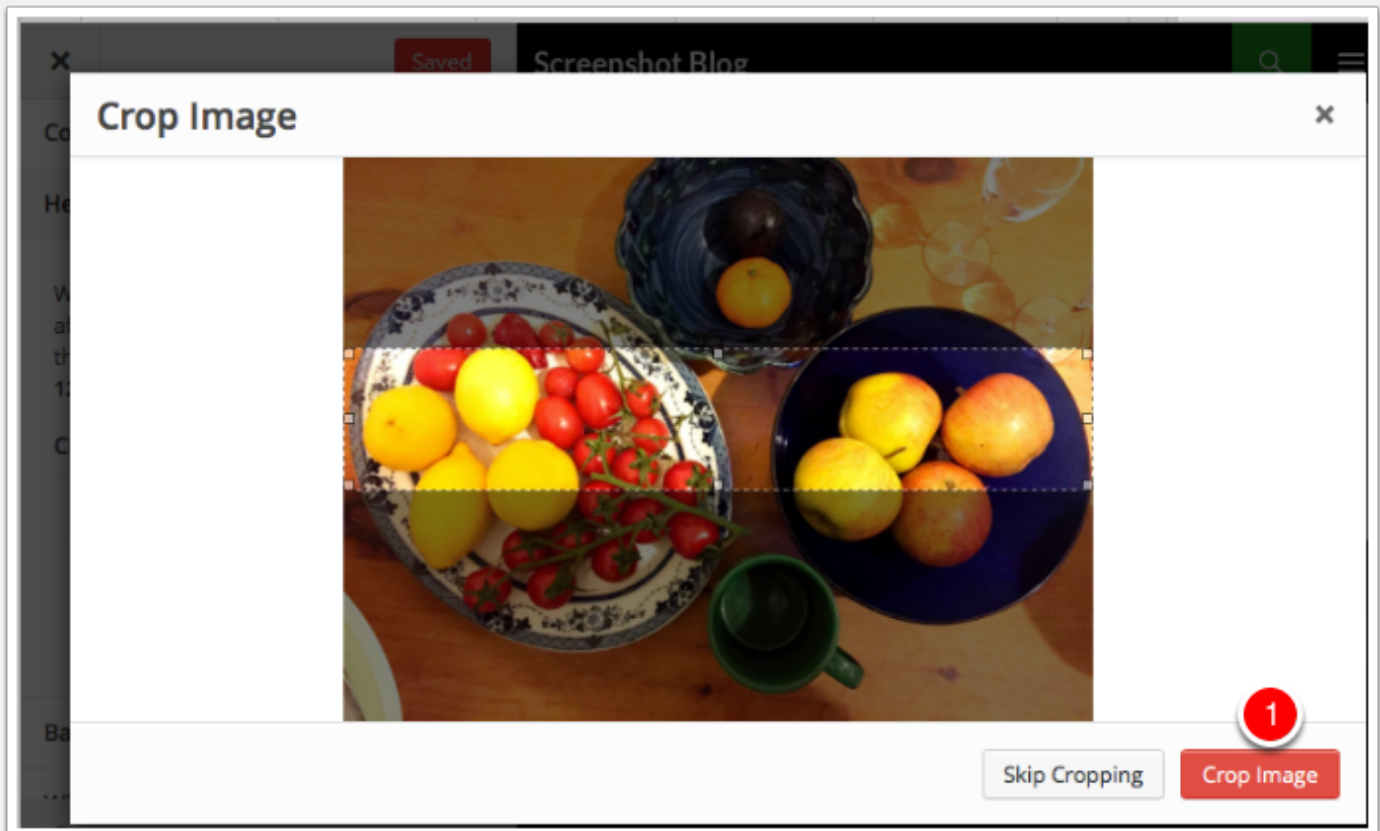

Adding a Header

Adding a Header

Crop Image

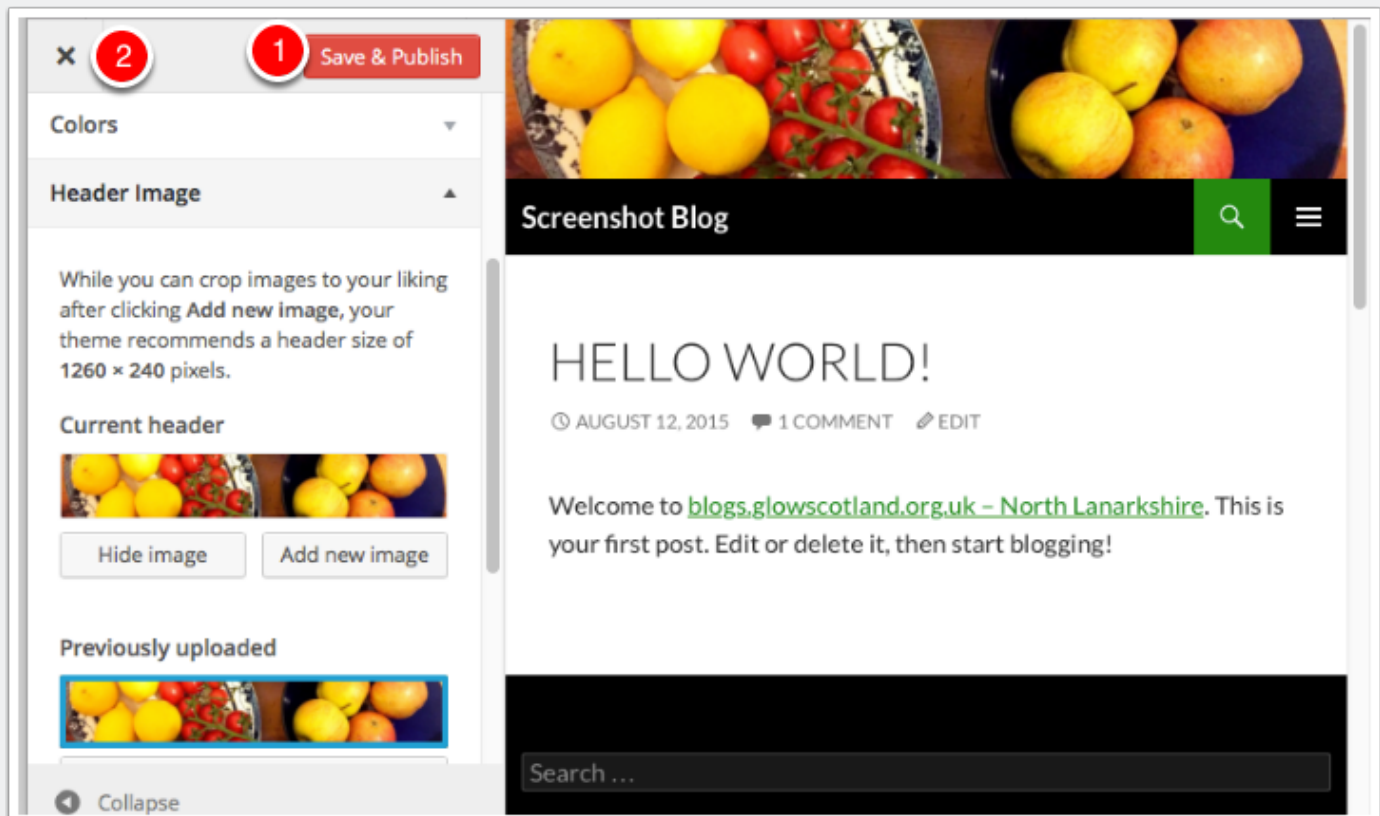

Next you will crop the image. The selection will be at the correct aspect ratio, it is best just to move this and then click Crop Image^[1].

Adding a Header

Preview and Save

The Crop image dialog will close and you will be able to preview your header. If you are happy Click **Save & Publish** and then close the customiser.

The screenshot displays a customiser interface for a blog header. On the left, a sidebar contains a 'Colors' dropdown, a 'Header Image' section with a preview of a fruit image, and a 'Previously uploaded' section. The main area shows a preview of the blog header with the text 'Screenshot Blog' and 'HELLO WORLD!'. A 'Save & Publish' button is highlighted with a red circle and the number '1'. A red circle with the number '2' is positioned near the close button (an 'x' icon) at the top left of the customiser. Below the main preview, there is a search bar.

Adding a Header

Randomising Images

You can upload more than one image to the customiser [1] and then set the header to show a random header each time the blog is viewed [2]. Remember to **Save & Publish**.
