

Physics Residential

Thursday 3 – Saturday 5 October 2013
Friday 21 – Saturday 22 February 2014

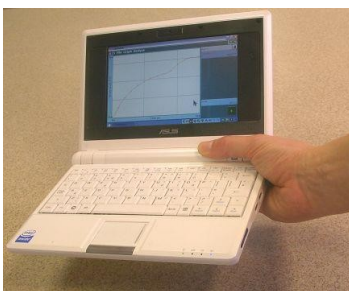

A 2 part residential course for Secondary Teachers of Physics

Building on the success of previous events, this course will focus on practical work to support Curriculum for Excellence up to level National 4&5. Practical work will be supported by discussion activities and talks from visiting speakers. Combined with opportunities for professional networking, the course offers participants a rich and vibrant programme that will enhance teaching and learning within their institutions.

The course will be held at SSERC, Dunfermline with overnight accommodation provided at the nearby King Malcolm Hotel. All meals are included throughout the course.

Only 20 places are available, so early application is advised. The course fee is £100.

Funding from the Scottish Government allows each delegate's school to receive resources to the value of £200 to help towards the immediate implementation of new activities. Resources include a netbook computer pre-loaded with some of the free software featured on the course.
