Careers Hive is a new flagship project by Edinburgh International Science Festival for all S1 to S3 students. This immersive event will focus on the vast range of exciting – and often unknown or underappreciated – opportunities available to those who study Science, Technology, Engineering or Maths (STEM).

This project will highlight that there are options available for everyone, irrespective of interest, in this rapidly expanding sector. By encouraging young people to discover where engagement with STEM could lead, Careers Hive will help address the rising tide of students not taking science from the end of broad education.

Careers Hive complements the Developing the Young Workforce – Career Education Standard (3-18) produced in September 2015 addressing the learners 'I can' statements by end of Broad General Education: S1 to S3.

On your visit you will be guided by a science communicator through three main activities

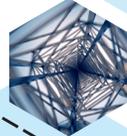

DREAM JOBS Auditorium

Listen to talks from inspirational people that work in great STEM companies such as games makers, hi-tech firms, medical companies and many others.

HEAL+ FEED

BUILD+ CONNECT

WORLD OF WORK SHOWCASE Grand Gallery

Four themed exhibition zones where students chat with young professionals about what they do, using practical activities as talking points.

DESIGN +PLAY

FUEL+ ENERGY

DISCOVER WHAT YOU COULD BE Education Centre

In this workshop led by science festival mentors, students will explore the world of STEM careers, understand their own talents and interests and explore future opportunities.
