

I do not know what answer is printed on the letters within the envelopes. **There are only two possibilities: yes or no.** In the wider world of reality, life is not always so black and white; often there is a gray region of indeterminacy. Yet for these letters there are exactly two possibilities: the answer is either yes or no...

The Qubits of College Acceptance
By Lily Turaski, 2015 Winner

There are only two possibilities: Yes or No

Win up to US\$1,500 for your quantum inspired short story in this international flash fiction competition!

Interested in storytelling? Get your creative juices flowing in writing a short story (of not more than 1000 words) inspired by some aspect of quantum physics and stand to win cash prizes, a trophy and original artwork to illustrate your story.

Your story must also include the sentence "There are only two possibilities: yes or no".

For entry requirements and a whistle stop tour of quantum theory and other interesting tips, visit shorts.quantumlah.org.

Closing date: 1 Dec 2017, 2359hrs GMT
