

FREE Science Storytelling CLPL

Ideal for:

- ELC and ASN practitioners
- Teachers with Early Level learners

Dynamic Earth are pleased to be offering a new CLPL series to help evolve your confidence, knowledge and skills in developing and delivering high-quality storytelling practice on a range of science themes.

Our specialist team and special guests will take you through a different aspect of storytelling practice in each session with activities and examples you can take back to your setting with learners.

October 26th
**Scotland Rocks: Scottish
Geology, Dinosaurs and Extinction**

Join us to explore the qualities of effective storytelling and presenting through the lenses of dinosaurs and extinction!

November 23rd
Diving Deep: Earth's Ocean

We'll look at how to develop your own science stories using the example of Scotland's marine environments. Explore the fundamentals of ocean literacy and link this to Learning for Sustainability.

December 14th
Galaxy Quest! Space Exploration

Learn to pitch to perfection, and how to make science accessible and inclusive through storytelling, using a space theme. We'll cover topical science space news and share some ideas for magical space learning in your setting.

January 18th
Rumble in the Jungle

Join us to show how we can create multisensory and immersive spaces for storytelling in your setting focussing on the theme of tropical rainforests and Learning for Sustainability through global citizenship.

February 23rd
**Puffin Power! Exploring
the Climate Emergency**

Explore how storytelling can improve climate change learning, using the example of puffins on the Isle of May. Learn how to enhance stories through activities, actions, songs and dance.

March 22nd
Outdoor Stories

In this session we'll show you how learners can become their own storytellers in outdoor settings, be they playgrounds, parks or wild Scottish spaces!
