

Transport Planner

What does the job involve?

- Developing transport strategies and plans that meet the needs of communities, businesses, and the environment, e.g. analysing travel patterns, demand, and transport data.
- Preparing feasibility studies, business cases, and technical reports to support transport projects across modes such as public transport, walking, cycling, and road networks.
- Collaborating with local authorities, Government, developers, and the public to ensure transport solutions are inclusive and practical.
- Contributing to policies that promote active travel, reduce carbon emissions, and improve accessibility.
- Using transport modelling tools and appraisal frameworks to assess the impacts of proposed schemes and ensure value for money.

What skills and qualities do you need?
