

# I am worried about Covid-19

what is it?

It is a disease caused by a virus called Coronavirus.

symptoms

a high temperature, a continuous cough,  
loss of sense of smell or taste.

facts

11th of June

132,001 people in Scotland tested.

116,319 people confirmed negative. **-**

15,682 people confirmed positive. **+**

This means, 12% of people tested are confirmed positive for Covid-19.

This means 88% of those tested do NOT have Covid-19.

11th of June

15,682 people tested positive. Of these people:

3,858 people had to go to hospital and have recovered.

613 people are in hospital.

15 people are in intensive care.

This means 29% of people with Covid-19 had to go to hospital.

Of those in hospital on the 11th of June 2% of people are in Intensive Care.

It would be like, if there were 100 people in a shop.

12 people could test positive.

2 people might have to go to hospital.

why is it such a big deal?

It was a new virus and spreads easily.

It spreads fast so people were worried too many people would get it at the same time.

What is different now?

We know more about it.

We are better prepared.

We know what to do to help.

What if I get it?

You might just lose your sense of taste or smell.

You might have a bit of a cough or a high temperature.

You might feel a bit unwell.

You might feel fine.

What should I do?

Stay home for 14 days.

Your parents/carer might give you paracetamol to help you feel better.

Wash your hands regularly.

Remember we are here to help. You can talk to us about your worries.
