

How to Tie My Tie

Put the tie around my neck with the thick and thin end at either side.

Pull the thick side down so the thin side is just above your chest.

Take the thick side and cross it over the thin side. Remember to hold the thin side.

Pull the thick side around the thin side. Keep holding the thin side.

You have made a loop.

Hold the centre of the loop.

Bring the thick side through the loop. Remember to keep holding the thin side.

The thick side should be over the loop and you should be holding the thin side underneath.

Wrap the thick side around the centre of the loop.

Wrap the thick side round again, but this time pull through the centre of the loop.

This is the wrap.

Pull the thick side through the gap between the wrap and the loop.

Straighten up your tie.
