

Deforestation

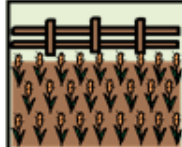

What is deforestation?

Deforestation is removing forests and trees.

Why does it happen?

To make space for farm land.

To make space for housing.

To make roads.

To mine the land.

To create paper.

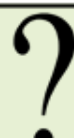

To create furniture.

Climate change causing more powerful forest fires.

Climate change causing less rainfall in the rainforest.

other reasons.

Why is it bad?

Less trees producing oxygen.

Less safe places for animals to live.

More carbon dioxide released into the air.

What can I do?

Plant trees.

Recycle where possible.

Buy wooden items that have the FSC logo

Use less paper.
