

Mum is having a baby

When it is time for Mum to have the baby, Mum will go to the hospital.

Mum might stay in the hospital for a couple of nights so the doctors and nurses are there to help.

When Mum is in the hospital I will stay with _____.

_____ will tell me when the baby has been born.

Mum will bring the baby home when the doctor says,

When the baby is born, the baby will sleep in _____ room.

Mum might not be able to take me to school, so _____ will take me to school.

_____ will collect me from school.

It might take longer at first for us to go places.

It can take a while to get used to having another member of the family.

We have to get to know one another.

Our family loves one another and our love grows for our new family member.
