

Senses are how the brain receives messages from within and out with the body.

Hypersensitive

I may speak quietly

It can feel sore if someone bumps into me

Smells upset me

I may try to avoid smells

I may prefer dry foods

I don't like to be touched

I don't like touching new things

Clothes can make me very uncomfortable

I may have a good memory

Alarms may distress me

It may be difficult for me to sleep.

something else

Sometimes I can be hyposensitive

Sometimes I can be hypersensitive

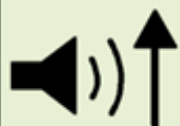

I can't control or choose to be hypo or hypersensitive

Hyposensitive

I may speak loudly

I may listen to loud music

I may not realise you have said my name

I might not have a good memory

I might think aloud

I need to touch things

I may need to touch people

I might not realise if I am hurt

I might bring things to my mouth

I might not know I have bumped into people

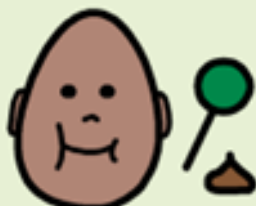

I might not notice smells

I often try to smell new things or people

I might prefer spicy foods

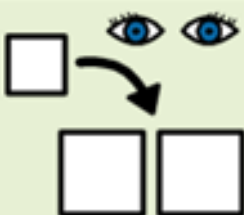

I might prefer sweet foods

I might prefer foods with strong flavours

I might like to chew a lot

I might experience double vision

I may get tired easily

Reading and writing might exhaust me
