

Introducing the Speech, Language and Communication Knowledge and Skills Matrix for the Early Years Workforce

Scottish Government
Riaghaltas na h-Alba

Created to support the development of SLC knowledge and skills across the pre-birth to 5 children's workforce.

The Knowledge and Skills matrix identifies the essential knowledge and skills required to support SLC development for all infants and children.

The matrix can be used by individuals, teams or whole settings to reflect on practice and quality and to support multi-agency planning for workforce development.

The accompanying self-evaluation tool provides a summary on a page of strengths and areas for future development at foundation, enhanced and leadership level.
