"A founding principle of e-Sgoil is to provide a wider, more equitable choice of learning experiences... We firmly believe DYW Live contributes to this"

Welcome to DYW Live. We are delighted to introduce to you a programme of free, online courses which will allow young people from across the country to participate in a range of live, interactive learning sessions. A founding principle of e-Sgoil is to provide a wider, more equitable choice of learning experiences for the young people of Scotland. We firmly believe DYW Live contributes to this and we are committed to growing the provision in the months and years ahead.

We are grateful to our partners who join us in facilitating these remote learning and teaching opportunities and to colleagues at Education Scotland who have worked with us to develop this national offer. We hope you can join us on DYW Live and we look forward to working with you and your young people in the weeks ahead.

"...schools will have a unique opportunity to build the entitlements from the Career Education Standard 3-18 into their curriculum planning"

DYW Scotland, e-Sgoil and Education Scotland have teamed up to work with a wide range of national partner organisations in order to create an exciting virtual learning offer for children and young people across Scotland to develop career education and enhance their employability, career management and work-related skills.

Given the current context of Coronavirus (COVID-19) schools will have a unique opportunity to build the entitlements from the Career Education Standard 3-18 into their curriculum planning from January 2021 onwards. The following live programme offers sessions across a wide range of themes and provides real scope for a range of partners to work with schools to develop rich learning opportunities.

"...many young people are facing far greater uncertainty at this key point in their lives, and it's vital they are given the support they need..."

The Covid-19 pandemic means that many young people are facing far greater uncertainty at this key point in their lives, and it's vital they are given the support they need to identify career possibilities and fulfil their potential. Developing the Young Workforce (DYW) has been in place since 2014 and has cultivated meaningful relationships between schools and employers right across the country, to help prepare them for their first steps into the workplace. DYW is delighted to partner with Education Scotland and e-Sgoil to support this innovative initiative, which enables young people to engage virtually with employers, from across a range of key sectors and apply what they learn in the classroom to the world of work. I would like to extend our sincere thanks to all the employers and sector bodies who are supporting this innovative programme.

— **Rob Woodward**
Chair of the Developing the Young Workforce National Group

DYW | Developing the Young Workforce

DYW Live has just finished its eight-week pilot...

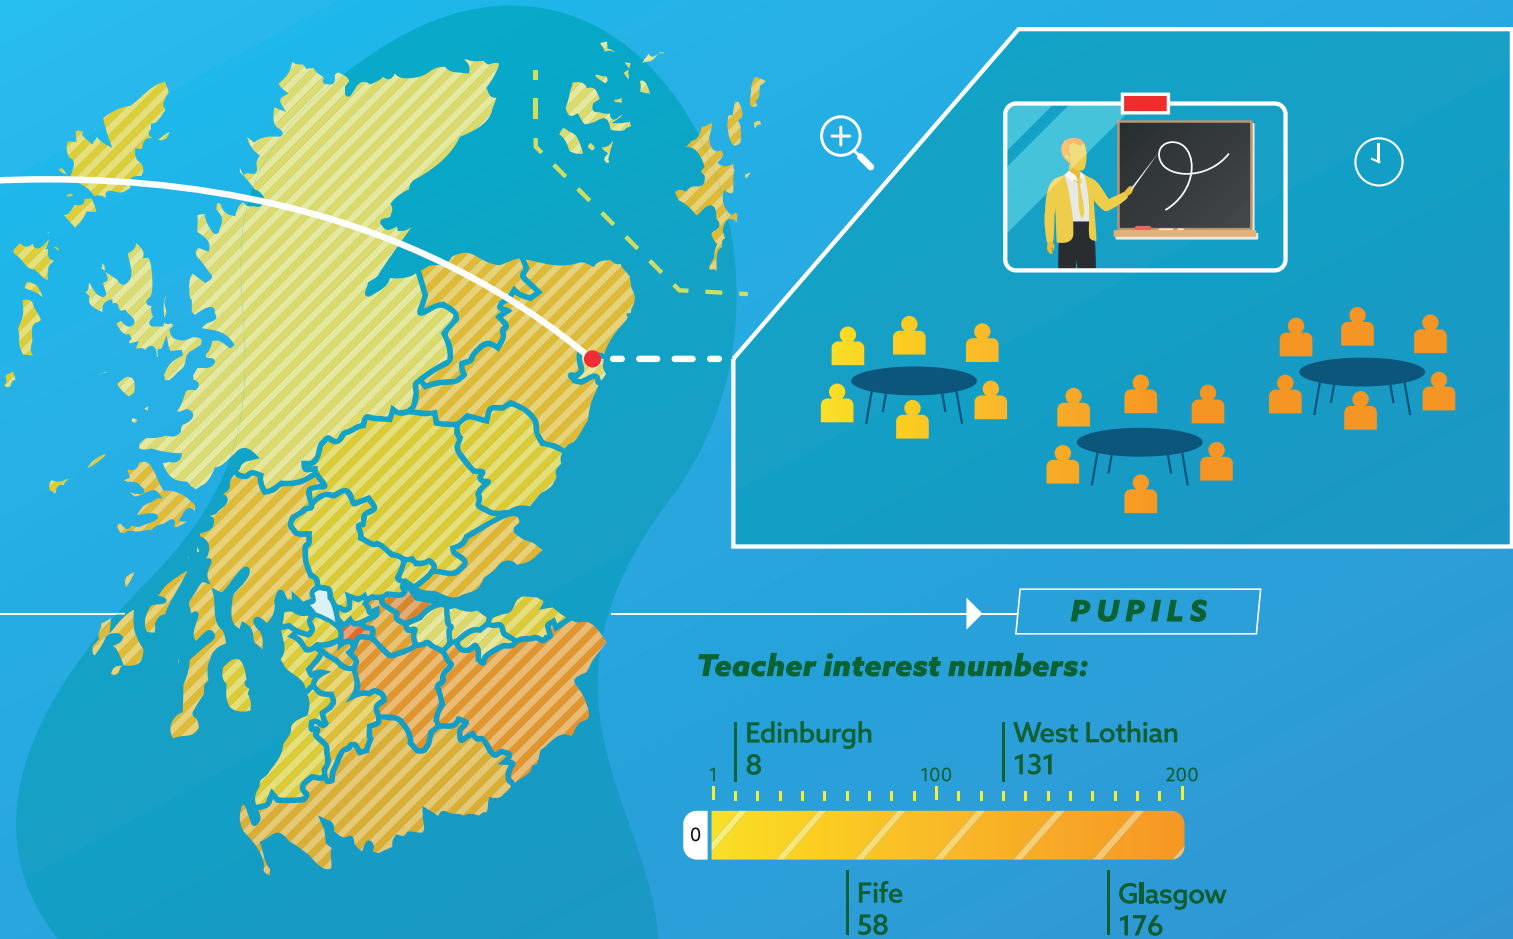

with **25 partners** offering over **30 courses**, totalling nearly **200 individual learner sessions**.

— CLAIRE CLARK FROM SDS ON DYW LIVE

We've loved being a part of DYW Live. It enabled us to get back into schools and also allowed us to expand capacity to deliver the service offer to multiple schools/classes simultaneously.

DYW Live sessions inspire our young people and help guide them in understanding their skills, subjects, and careers.

A TEACHER ON DYW LIVE

Phase 1 had over **250 teachers** register interest and had over **6000 attendances** at our sessions from schools across the country.

DYW Live — What's on offer?

How do I register my interest?

Lead teacher and practitioners can register interest in specific DYW Live courses at **e-sgoil.com**

Glow access is required to register for DYW Live.

Lead teachers will be automatically added to MS Teams on Glow for each course they have registered interest in. These teams will be managed by partners delivering live sessions.

Partners will communicate with lead teachers/practitioners via these MS Teams. Partners will confirm participation and will notify participating education staff of any requirements or updates to live sessions.

What happens during a DYW Live session?

Most DYW Live sessions will adopt this process:

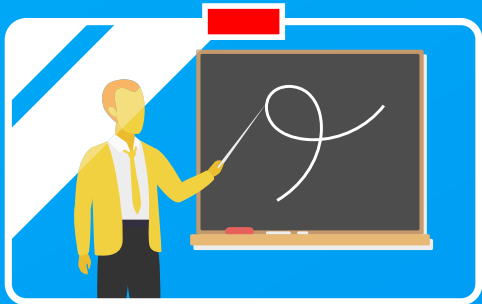

Two partners per session; one delivering the live session, the other managing the chat function.

Live session streamed to Lead teacher/practitioners via MS Teams on Glow.

Lead teacher to communicate with partners via MS Teams chat function

Lead teachers/practitioners will broadcast live feed to learners within their own centre and communication with the delivering partners via the MS Teams chat function. Learners can provide responses for lead teachers/practitioners to enter into chat.

DYW Live would like to thank its partners...
