

MULTI AGENCY PRACTICE LEARNING SESSION

“Getting it right for everyone”

These sessions are for all practitioners working with children and families. The training will be interactive and will be an opportunity for workers in all partner agencies from Health, Police, Third Sector, Education and Social Work to come together and discuss their experiences. A brief introduction will be around:

- Current developments across GIRFEC and Child Protection
- Recognising values and principles
- An Appreciative Inquiry approach will be used to reflect on ‘Promoting positive relationships through collaboration and mutual understanding’.

Appreciative Inquiry – the 4-D cycle

This will give an opportunity in small groups to discover and appreciate our best experiences of working together; to envision ideal multi-agency working and to design how we would like this to look in the future.

It will be a chance to go with the flow...allow ourselves to dream and to discover that the destiny of multi-agency working at its very best, is ours to design!
