

Activating a Glow Blogs tile for your users.

This guide is aimed at RM Unify Admins who wish to give access to members to of their establishment to Glow Blogs on another instance.

Log on to Glow and click on the app Library link at the top right of the Launchpad:

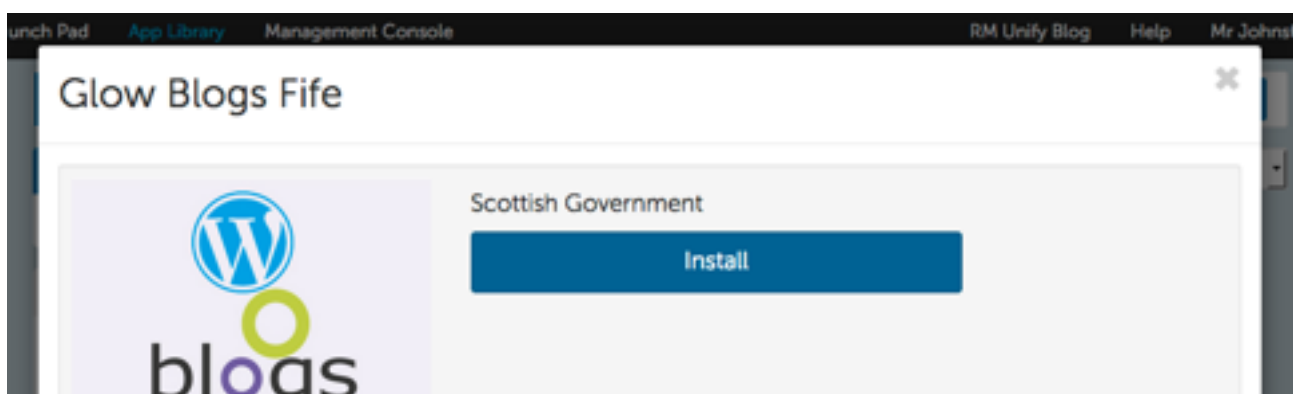

Search from the Name of the LA, in the screen shot below fife:

Click on the title and click install.

On the next screen

1. agree to the T&C
2. Check the boxes for which users should have access
3. Optionally add it to their launchpad too.
4. Save
