

# Creativity

the greater the number of units of music classes the greater the creativity

creative thinking in music - change in extensiveness, flexibility, originality and syntax as opposed to didactic teaching.

Researchers have paid less attention to the impact of music Creativity than on other types of learning.

more effects for music students than visual arts

To enhance Creativity, music lessons must be based on creative activities.

Better motor development

Music students score higher on tests of Creativity.

Daily music increases creativity
