

September - Finances and Support/Harvest

Article 26 - Social and Economic Help, **Article 27**- Food, Clothing and Safe home **Article 24** - Health, Water, Food, Environment

Activity 1 - Harvest - Abigail (ECO)

Resources - Creating posters with the children, Donations for foodbank, harvesting veg

Activity 2 - - Upcycling clothes - Lisa (ECO) (STEM)

Invite children through a seesaw post (previous week) to bring in a piece of clothing that they would like to upcycle.

Use a range of materials to upcycle clothes, this could be fabric glue, gems, pens, tie dye.

Resources - glue, gems, pens, dye.

Things to think about - **UNCRC** - Children right to financial support for clothing to ensure basic needs are met.

ECO - When discussing with children the effects of fast fashion, showing them pictures landfill etc. and the benefits of reusing, upcycling or donating clothes.

STEM - discuss different textiles, fashion designers, the process of making clothes etc.

Activity 3 - No Money Day Story

Read the book with the children, discuss afterwards the difference between a 'Need' and 'Want' - make a visible chart with children to document this e.g. water/food is a need and lego is a want. Discussing activities that can take part with family that doesn't involve money e.g. going for a walk in the woods.

Resources - No Money Day book. Paper and pens for chart.

Things to think about - Make use of the playroom as inspiration when thinking about what is a need and want. E.g. snack are is a need, when outdoors we don't need bikes but what could we use in our natural surroundings to play.

Activity 4 - Visit Shop with a budget to buy ingredients to make pizzas

Children visit the shop with a budget to buy the ingredients needed. If the budget doesn't stretch, what could we do without? Encourage the children to discuss and decide what the feel is most needed for their pizza's.

Resources - **Money for shop**. Ingredients list for pizzas and recipe card. Breville Machine in room to grill pizzas.

Things to think about - What could we use the leftover ingredients for, e.g. Peppers could be sliced and used with our natural yogurt as a dip.
