Vision 2030+ Report launched by Ministers

Vision 2030+, the Concluding Report of the Learning for Sustainability National Implementation Group, has been formally accepted and launched by Ministers. The Report celebrates the progress that has been made by Scottish Schools and reaffirms the importance of LfS as an entitlement for all learners. It also sets out the vision for LfS through to 2030 - the target date for realising the United Nations Sustainable Development Goals.

In launching the Vision 2030+ Report, Shirley-Anne Somerville MSP, Minister for Further Education, Higher Education and Sciences said, "It is now essential that we maintain the momentum and ensure that Learning for Sustainability is fully embedded across our approach to curriculum and our three over-arching strategic priorities for education: the National Improvement Framework, Scottish Attainment Challenge and Developing the Young Workforce. Learning for Sustainability has a crucial role in supporting and enhancing these priorities."
