Head Teacher
Ms Alison Mitchell BA, MEd

Dear Parent / Carer

COVID-19 Lateral Flow Device Testing for our school

Thank you for your support to help keep our school safe for everyone. A vitally important part of this is regular testing at home using Lateral Flow Device (LFD) tests. For that reason, I am asking you to encourage and support your child to:

- **Test regularly (twice a week) at home;** and
- **Report all results, whether positive negative or void, at www.covidtest.scot or by calling 119.**

Why does testing and reporting results matter?

- Regular, twice-weekly testing at home can identify people at an early stage who have Covid with no symptoms. By asking them to self-isolate, we can reduce the risk of the virus being passed on and avoid more of our young people and staff missing school over the winter period.
- Reporting positives means your family will receive the advice and support you need. Reporting negative and void results helps public health experts to understand the full picture of COVID in our area, and to plan to protect communities and keep schools safe and open.

What else do I need to know?

- The online portal for reporting results has been improved following feedback – you can now register family accounts that save key information for all your family members, so it only takes a few minutes to report results using your phone.
- All our school pupils can access LFD test kits free of charge from the school office – these can be collected at the start / end of the school day, at intervals and at lunchtimes. If your child is not yet testing on a regular basis we would encourage them to do so. Children under 16 are required to have their [consent form](#) signed by a parent or carer.
- LFD tests are very good at identifying people who don't have symptoms but who have a "high viral load". Those are the people who are most infectious and likely to pass the virus onto others. All LFDs supplied by schools have passed rigorous safety tests.

NB: If your child receives a positive result from their LFD at home or has symptoms, they must report any LFD result online (or by calling 119), self-isolate and book a PCR test via NHS Inform at www.nhsinform.scot. Everyone in the household should also self-isolate and follow the advice about next steps on NHS Inform.

Thank you for taking the time to read this, and for contributing to the shared effort to test, report and keep our school community safe during the winter period. Further information for parents is at: www.parentclub.scot/articles/covid-19-testing-staff-and-pupils, and more general information on LFD testing can be found at www.nhsinform.scot. Frequently Asked Questions for young people, designed in partnership with Young Scot, can be found on [this link](#).

Yours sincerely,

Alison Mitchell
