Keeping safe online

You will need:
- a smartphone, tablet or computer

What to do:

Every term in ICT we look at different ways to keep safe online.
Our 2 favourite websites have been 'ThinkUKnow' and 'Google Interland'

Today I would love if you could visit either (or both) of those sites and give yourselves a little refresher!

Remember, we should be learning about being kind and responsible, keeping ourselves and others safe, and thinking carefully about how we store and share information online.

Follow the link attached for websites!
