

# What are we doing to improve our school this year? 2022-2023

We are developing our approach to teaching and learning in writing with a focus on genre features and a holistic assessment.

We are introducing play based learning in primary 2 and continuing to develop this in primary 1.

We are working to ensure that pupils have a meaningful say in decision making across the school.

Teachers will be working to track attainment and plan for interventions. We will continue to put support in to raise attainment.

We are going to re-establish and develop parental engagement now that restrictions have gone.

We are going to review our vision, values and aims for the school with all parents, pupils and partners.
