Achievement

Thoughts compiled by Primary 2/3

Primary 2 and 3 have been investigating our school values and what they mean. Our particular class focus has been Achievement. Initially they spoke about what they think it means, sharing their thoughts and excellent ideas. The pupils have started to develop a good understanding of what achievement looks and feels like.

A great description came from one of the primary 2 girls who explained achievement as "When you think you can't do something but you try it a few times and then discover that you can do it. It makes you feel proud of yourself."

After their initial discussions, the children thought about their personal achievements and shared them with each other. They also spoke about how they can become better at something by practising and not giving up.

What a talented and successful group of learners we have in Primary 2 & 3 - they are really looking forward to sharing some of their brilliant personal successes and achievements with you through our video very soon.

Thank you for reading our thoughts.
