Character Analyser

Analyse means to examine something in detail to explain it.

Using the information that you have read from your book so far, write what you know about the main character.

You can use the questions below about the main character to help.

- 1. Describe the main character's physical appearance (what they look like).
- 2. List 3 qualities or traits that the main character has. (Their personality, what are they like? Funny, kind, helpful).
- 3. What event in the story has been most important to the main character so far?

Creature from the deep

Using the picture below, try to come up with some answers to the following questions.

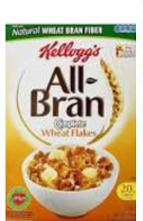

- 1. Who are the people in the boat?
- 2. What do you think the people in the boat are doing?
- 3. Who would you call to help in an emergency like this and why?
- 4. If you were one of the people in this city, what would You do?
- 5. From what we can see the creature looks very large. How do you think it got this size?
- 6. Where do you think the creature is from?
- 7. If you had this creature as your pet, what would you call it?
- 8. What do you think is going to happen in this story?
- 9. What do you think the building in the middle of the picture is?

Cereal Design Examples

Persuasive Discussion

This forest should be cut down and the land should be used to build a new theme park.

First of all, decide whether you think they should cut down the forest or not. Now using some of the phrases below give reasons why you think this way.

How many of these words and phrases can you use in your discussion?

- Is it really worth...?
- This needs to be dealt with...
- A friend of mine says...
- No-one but a complete idiot would believe that...
- We can do without this...
- Of course...
- It is disgraceful that...
- How unfair! Another thing...
- I believe that...

- More importantly...
- If this goes ahead...
- Surely...
- Local people feel that...
- Do you really think...?
- How could we possibly...?
- I hope that you agree...
- Do you want to be part of... ?
- An intelligent person like yourself...
- As a result...
- This will cause...
- It goes without saying...

- Evidently...
- The real truth is...
- Another reason...
- I strongly believe...
- I am sorry that...
- It will ruin...
- In my opinion...
- It would be a good idea if you could...
- This will mean that...
- We can solve this by...

Example Cupcake Recipe

Ingredients:

110g softened butter

110g golden caster sugar

2 large eggs

½ tsp vanilla extract

110g self-raising flour

For the buttercream

150g softened butter

300g icing sugar

1 tsp vanilla extract

3 tbsp milk

food colouring paste of your choice (optional)

Method:

STEP 1

Heat oven to 180C/160C fan/gas 4 and fill a 12 cupcake tray with cases.

STEP 2

Using an electric whisk beat 110g softened butter and 110g golden caster sugar together until pale and fluffy then whisk in 2 large eggs, one at a time, scraping down the sides of the bowl after each addition.

• STEP 3

Add $\frac{1}{2}$ tsp vanilla extract, 110g self-raising flour and a pinch of salt, whisk until just combined then spoon the mixture into the cupcake cases.

STEP 4

Bake for 15 mins until golden brown and a skewer inserted into the middle of each cake comes out clean. Leave to cool completely on a <u>wire rack</u>.

STEP 5

To make the buttercream, whisk 150g softened butter until super soft then add 300g icing sugar, 1 tsp vanilla extract and a pinch of salt.

STEP 6

Whisk together until smooth (start off slowly to avoid an icing sugar cloud) then beat in 3 tbsp milk.

STEP 7

If wanting to colour, stir in the food colouring now. Spoon or pipe onto the cooled cupcakes.

Maths - Addition using partitioning

EXAMPLE:

TU TU

48 + 25 = 73

Step 1: Add the tens - 40 + 20 = 60

Step 2: Add the units -8 + 5 = 13

Step 3: Add the two answers together 60 + 13 = 73

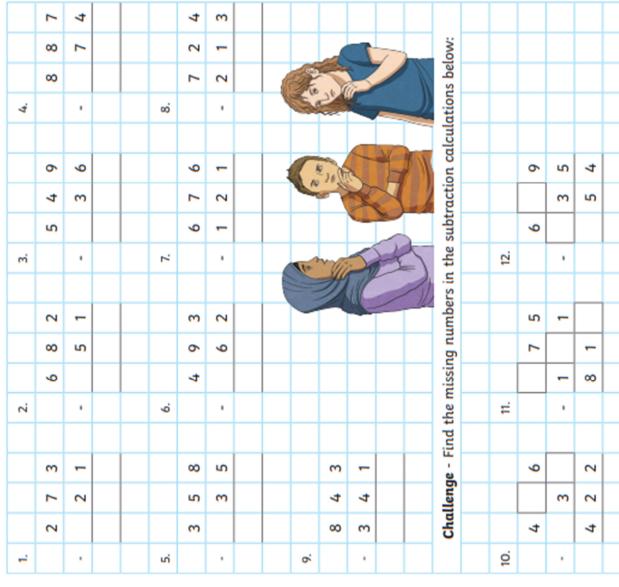

If your number starts with hundreds or thousands, add them first.

1*		2*	3*
1.	23 + 15	125 + 252	1245 + 3254
2.	75 + 26	254 + 361	2547 + 7859
3.	89 + 74	458 + 258	2365 + 5423
4.	42 + 13	347 + 654	3654 + 5421
5.	22 + 65	124 + 325	7521 + 2389
6.	78 + 28	258 + 578	2987 + 9864
7.	46 + 18	654 + 742	3698 + 3356
8.	32 + 32	245 + 456	2458 + 8564
9.	56 + 39	785 + 125	1152 + 2365
10.	67 + 42	456 + 753	4578 + 3895

Money Matters – Party Planning

1* task

You have been given £20 and 10 children are coming to the party.

Crisps – 20p each

Blackcurrant Juice – 50p each

Orange Juice – 40p each

Big bag of sweets - £1

Cupcakes – 30p each

Sausage Rolls – £1.50 for 10

Mini Cheeses – 20p each

Hot Chocolate – 10p each

Balloons - £3

2* task

You have been given £35 and 10 children are coming to the party.

Crisps – 55p each

Blackcurrant Juice – 52p each

Orange Juice – 48p each

Huge bag of sweets - £2

Cupcakes – 40p each

Sausage Rolls – £2.50 for 10

Mini Cheeses – 45p each

Hot Chocolate – 15p each

Balloons - £4

3* task

You have been given £50 and 15 children are coming to the party.

Big Crisps – £1.50 each

Blackcurrant Juice – 58p each

Orange Juice – 32p each

Huge bag of sweets - £5

Cupcakes – 85p each

Sausage Rolls – £2.50 for 10

Mini Cheeses – 40p for 5

Hot Chocolate – £1 each

Balloons - £10

Thinking and Talking about My Learning - P6 and 7

	1	2	3	4	5	6
A	Were there any tasks today that I found too easy? Why? Could I have added my own challenge?		Did I estimate correctly how long each task would take? If not did I under estimate or overestimate?	in a specific order? Did I start with the easiest	Did I try going back to a tricky task later and reading it again? Did it make a difference?	Did any of yesterday's tasks make more sense today now that my brain has had time away from it?
В	Which parts of today's tasks used knowledge I felt confident about remembering?	Which tasks had new learning in them? What did I learn?	Thinking of one of my tasks. Did I understand the concept that I was working on?	on task today?	Can I think of ways to improve my motivation for tomorrow?	Do I need to practise anything to make tomorrow's learning easier?
С	Did I have everything I needed to complete the tasks? Did I use anything to help me?	Did I get stuck? How did I get past that? Did I give up or try something else? What did I try?	What made my learning stick today? What did I do that helped me understand a particular task?		How long do I think I will remember what I learned? How could I check next week, next month?	Am I unsure or muddled about anything after today's work? What can I do to become clearer or more sure?

Thinking about how you learn can help you learn more effectively.

At the end of a day of learning you might like to choose a row (A, B or C) and roll a die to select 2 or 3 questions to think about.

You can think about them by yourself or, even better, discuss them with someone else.
