relationships and life.'**
Responsibility Values Empathy Respect

P5/6/7 -Term 4 - 2026

IDL – For our first topic this term, P5-7 will be learning about the amazing human body. This will include learning about the names of bones and organs in the body and their important role. For the second part of the term the class have free choice of their topic, so they are currently thinking of lots of good ideas.

Numeracy – This term we will revisit fractions, decimals and percentages and will focus on data handling, expressions and equations. Additionally we will continue to embed a variety of multiplication and division strategies.

P.E. - We will be sharpening our skills in athletics, rounders, Boccia and golf this term. P.E. will remain on Tuesday afternoons and Thursday mornings.

Writing/Grammar – We will be focussing on explanation and discursive writing skills. We will also be learning how to use contractions effectively in our writing.

P7 Leavers – This is a busy term for the P7's as they prepare to fly the Rothiemay nest. They will be participating in some fun activities for the Moray Outfit adventure days and transition days at secondary school. We also have visitors from the literacy and numeracy departments coming to meet the pupils.

HWB – We will be learning about the effects of substance abuse on our bodies.

French – Tying in with our class topic, we will be learning the names of body parts in French.

Many Thanks,

P5/6/7, Mrs Fletcher & Mrs Bekri-Watt
