

Butterfly Finger Puppet

Make a Butterfly Finger Puppet

1. Colour in your butterfly carefully, making sure that it is symmetrical – so, if it has a purple spot on the large wing on one side, the other large wing must have a purple spot in the same place.
2. Cut around the dotted outline of the butterfly.
3. Make 2 cuts along the dotted lines in the middle of the butterfly – this makes the strap for your finger.
4. Fold the butterfly in half, then open it out and slip your finger through the strap so it becomes the spine of the butterfly.
5. Now wiggle your finger up and down to make the wings flap and watch your butterfly fly.
