

SCIENCE

LI: We are learning more about our senses.

We are learning about taste.

SC: I can explain how we taste things.

I can describe some different tastes.

I can explore my taste buds.

Activities

1. Watch the **powerpoint** about taste.
2. Try the **Jelly Bean Investigation**. Can you think of a better investigation?
3. Watch **How Your Tongue Works** -
https://www.youtube.com/watch?time_continue=2&v=0hwOL91cjwM&feature=emb_logo
4. Play the **Taste Matching Game** - Can you put different foods into sweet, bitter, sour or salty groups? Gather up a variety of foods that you think might fit into different categories of taste. Taste one of the items and record whether it tastes sweet, bitter, sour or salty. After you have tried all the food, compare your results with the rest of the family. Does everyone agree?

You can use the sheet below to record your results:

4 different tastes chart

Sweet	Salty
Sour	Bitter

Optional Activity:

Picnic activity - (**PDFs** - picture and instructions).

Now try and draw a picture of a picnic that has food in all 4 taste groups.

Next week we will be finding out about touch!

I look forward to seeing your pictures on Seesaw or Twitter.
