

Mental Arithmetic Addition and Subtraction Superheroes

Two Player Game

Take turns to select a card. Complete the calculation. Once you have completed the calculation, check your answer. If your calculation is correct, join two of the dots with a horizontal or vertical line and the turn is passed to the other player. If the answer is incorrect, the turn is passed to the other player without drawing a line.

During the game, boxes will be made by four lines joining together. The player who draws a line that finishes a four-sided box writes their initials in the box. Each box is worth a point. If a box is made around a superhero, it counts for five points.

The person with the most points by the end of the game wins.

$82 + 72 = \underline{\quad}$
