

# OUTDOOR EDUCATION

Keith Primary staff are keen to empower children by giving them quality outdoor learning experiences that help connect pupils with nature.

In creating opportunities and giving the children positive outdoor learning experiences, pupils will hopefully appreciate and want to learn more about nature as well as protect it.

THANK YOU!

We applied to **Hill of Towie Wind Farm Community Fund** for funding to enable us to do this. We received a very generous grant of **£13,616.67** which allowed us to purchase an outdoor classroom. The build included solar panels which gives us energy for lights. We also fitted it with a heater to make it a comfortable space in the colder months of the year.

Thank you! 😊

A big thank you must go to our Janitors Mr Stuart and Mr Gauld who worked hard to put the outdoor classroom together. Team work is dream work! We think it looks fantastic!

**GrantScape**  
The Experts in Community Fund Management

We applied to **Grantscape Greener Grids** to help us resource our outdoor classroom. We received a grant of **£5000** for STEAM kits, lots of gardening equipment, science resources and flexible furniture for use indoors and outdoors.

The space is now available for all classes to use. We hope to keep adding to the resources to make the outdoor classroom more user friendly e.g. putting up a large teaching whiteboard, shelves, posters, as well as gathering more books about plants, insects, weather and animals for pupils to use when outside.

Items below were purchased with the **£5000** funding received from **Grantscape Greener Grids**.
