

# KPS partnered with the Learning Centre and Keith Library for **Digi Fun**

WHO?

CHILDREN FROM P3 AND P4

P3 and P4 pupils were accessing new technologies to become digital masters and critical consumers. They were developing future skills to equip them with the creativity, collaboration, critical thinking and computational skills for the evolving world.

## Developing Metaskills

The children used a range of metaskills: adapting; focusing; collaborating and curiosity to explore a range of technologies. They used tools to enhance the digital curriculum including lego spike, spheros, botley, VR, Osmo, Indi and much more. A very exciting experience to promote digital readiness.
